

Westwood Building Permit Application & Fee Schedule

Apply and pay for a building permit application using [this link](#). Work should not begin until the permit is paid for and in your possession. Penalties may apply for work prior to issuance of a permit.

The building permit fee schedule includes a flat fee for certain types of projects like residential electrical upgrades, mechanical and plumbing, demolitions, sidewalks and driveways. The fees for new residential construction, commercial alterations, remodels and tenant finishes are based on valuations determined by a formula chart provided by the ICC.
